

## Disability Support Pension Impairment Tables Questionnaire

---

Response: 124

Kim Sattler

<b>11a Select the key theme of the proposed changes to the Impairment Tables that is the most important to you</b>
Chronic Illness
<b>11b Select the theme of the proposed changes to the Impairment Tables that is the second most important to you</b>
Pain
<b>11c Select the theme of the proposed changes to the Impairment Tables that is the third most important to you</b>
Ongoing side effects of treatment
<b>12a (i) The removal of the term 'permanent condition' provides greater clarity that a condition must persist for two years as part of the DSP eligibility criteria</b>
Agree
<b>12a (ii) The proposed changes more clearly describe the requirements of diagnosis, treatment and stabilisation of conditions for DSP assessment</b>
Unsure
<b>12b Please provide any additional comments regarding changes to the FDTs requirement</b>
It is very hard to access full diagnosis and treatment in regional NSW due to long wait lists, lack of doctors and specialists and costs. People on low incomes can't get proper reports or diagnosis for complex multiple conditions
<b>13a (i) The inclusion of additional defined terms provides greater clarity around terminology used in the Instrument</b>
Agree
<b>13a (ii) Simplification in Part 2 of the Instrument improves the guidance and readability of the section</b>
Agree
<b>13a (iii) The proposed changes to Table introductions and descriptors has made it easier to understand the requirements of Tables</b>
Agree
<b>13a (iv) The additional guidance in appropriate Tables provides greater clarity when considering functional impairment. For example an additional guidance point to all Tables on fluctuating and episodic conditions</b>
Agree
<b>13a (v) The updating of references to relevant assistive technology provides clearer guidance and modernises the Tables</b>
Agree
<b>13a (vi) The broader range of examples in the Tables illustrates how a person's functional impairment may impact their ability to work</b>
Agree
<b>13b Please provide any additional comments on the proposed operational improvements.</b>
I work with a disability with a good employer but assistive technology is so expensive we often can't afford it and we have to adapt other aids.
<b>14a The proposed changes recognise and capture the functional impacts relating to alcohol, drug and other substance misuse in appropriate Tables</b>
Agree

**14b Please provide any additional comments regarding changes about the impacts from alcohol, drug and other substance misuse.**

People who endure chronic pain often have complex drug interactions with different medications and alcohol. Many GP's do not understand these interactions. It is very hard to get good pain management advice for arthritis in particular.

**15a The addition of guidance recognises the impacts of ongoing side effects from prescribed medication and treatment**

Agree

**15b Please provide any additional comments regarding changes about the ongoing side effects of treatment.**

Patients who are on long term medication experience complications especially if they have heart conditions or asthma. Very hard to get expert advice and support in regional areas.

**16a (i) Proposed changes better represent the functional impact of pain**

Agree

**16a (ii) Additional examples of pain related conditions that result in functional impairment provide more clarity around the types of conditions that may be assessed against a Table**

Agree

**16b Please provide any additional comments regarding changes about pain.**

Chronic pain is experienced by millions of Australians especially as we get older.

**17a Additional examples of chronic illnesses that result in functional impairment provide greater clarity around the types of conditions that may be assessed against a Table**

Agree

**17b Please provide any additional comments regarding changes about chronic illness.**

Many of us have more than 2-3 chronic conditions!

**18a Additional examples of renal conditions that result in functional impairment provide more clarity around the types of conditions that may be assessed against a Table**

Agree

**18b Please provide any additional comments regarding changes about renal conditions.**

Many medications used long term can result in kidney failure but we are offered no alternatives.

**19a (i) Additional examples of fatigue related conditions that result in functional impairment provide greater clarity around the types of conditions that may be assessed against a Table**

Agree

**19a (ii) The inclusion of a personal care descriptor captures the functional impacts of fatigue on a person's ability to undertake personal care activities**

Agree

**19a (iii) Proposed changes better represent the functional impact of fatigue related conditions**

Agree

**20a Additional examples of cancer and subsequent conditions that result in functional impairment provide more clarity around these types of conditions that may be assessed against a Table**

Agree

**21a (i) Additional examples of specific pieces of evidence that may be used to support a claim assists individuals to identify the accepted range of medical evidence that can be provided**

Agree

**21a (ii) Additional examples of professionals assists individuals identify the range of appropriate practitioners who are able to provide medical evidence in support of their claims**

Agree

**21b Please provide any additional comments regarding changes to medical evidentiary requirements.**

The more options the better the harder it gets to visit a GP or a specialist especially in regional areas

**22a (i) Addition of descriptors better capture shoulder function in Table 2 - Upper Limb Function**

Agree

**22a (ii) The addition of descriptors for the loss of function of a dominant limb under Table 2 – Upper Limb Function better recognises functional impacts of losing a dominant upper limb**

Agree

**22a (iii) Additional examples of specific skin conditions that result in functional impairment provide more clarity around the types of conditions that may be assessed against a Table**

Agree

**23a The proposed changes better capture the functional impacts of balance, dizziness and a person's ability to stand**

Agree

**24a The proposed change will better support individuals by providing a broader range of medical professionals allowed to provide corroborating evidence in support of a diagnosis of a mental health condition for assessment under Table 5 – Mental Health Function**

Agree

**25a The proposed changes improve alignment with other recognised mental health assessment tools (including the World Health Organization Disability Assessment Schedule –WHODAS, Diagnostic and Statistical Manual of Mental Disorders – DSM, World Health Organization International Classification of Diseases - ICD)**

Agree

**26a (i) Proposed changes better reflect conditions on the spectrum of neurodiversity**

Agree

**26a (ii) The addition of a new social skills descriptors in the table relating to brain function recognise difficulties a neurodivergent person may experience in social situations**

Agree

**26b Regarding the proposed change on Table 6 – Brain Function to better recognise social skills difficulties, would you prefer to:**

add a new social skills descriptor and require a person to meet at least two descriptors for the relevant impairment rating to be assigned

**27a The proposed changes better recognise the need for culturally appropriate assessments**

Agree

**28 In accordance with the Privacy Collection Notice, please select one of the following.**

I would like my submission to be published with identifying information (including name or name of organisation as provided in the questionnaire)
